DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 7/3/03 and 3/8/04 have been considered by the examiner.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a more detailed with regard to the tool for creating a mandrel must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. The drawings are not sufficiently descriptive to provide a clear illustration of the tool for creating a mandrel.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: The disclosure is objected to for failing to providing references for the structure associated to the tool for creating a mandrel, such as the mandrel, the cylindrical rod (para. 64), a mother tool (para. 67) to correspond to figures 8A and 8B, as well as figure 10.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 24-27 are allowable.
5. The following is an examiner's statement of reasons for allowability: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 24-27, wherein a tool for creating a mandrel comprises a circular-shaped portion of an elliptical shape and a plurality of facets disposed adjacent to said circular-shaped portion, each facet approximating a portion of the elliptical shape, as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art and all of said features are relied upon for a determination of allowability.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references have been cited for disclosing a device or tool associated with an elliptical component, but unlike the present invention, these references do not disclose a tool for creating a mandrel comprises a circular-shaped portion of an elliptical shape and a plurality of facets disposed adjacent to said circular-shaped portion, each facet approximating a portion of the elliptical shape, as claimed: Kobayashi et al. (4497144), Herbert et al. (6007692), Piispanen et al. (6233990), Ben-Menachem et al. (6460437) and Kendall et al. (20040050908).
7. This application is in condition for allowance except for the following formal matters:
Refer to items 2 and 3 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
